

Hushoffice Acoustic Pods

Hushfree line

hushoffice

For what happens inside.

Build for what happens inside.

A new standard for human-centred workplaces.

Work today is shaped by constant shifts between focus and collaboration, presence and hybrid interaction, performance and recovery.

Navigating these moments depends on how people feel throughout the day - their ability to think clearly and stay comfortable in the spaces around them. That's why great workplace design starts with what happens inside: people and the environments that help them thrive.

Designed to belong

The Hushfree line by Hushoffice combines advanced acoustics, intuitive technology and flexible design to create spaces that adapt to people - not the other way around. From compact one-person pods to fully accessible team spaces, complemented by a nature-inspired system of colours and finishes, Hushfree solutions help organisations create more cohesive and intentional workplace environments.

Because acoustic pods are no longer an added element. They become a natural part of the space.

Where every element belongs.

Hushfree line–premium acoustic pods built around people

The Hushfree line is Hushoffice's most advanced portfolio of acoustic pods. Designed for modern, flexible offices, it offers a scalable range of solutions that support focused work, collaboration, and inclusive experiences across the workplace. Certified to the ISO 23351-1:2020 standard, these pods create a professional acoustic barrier that guarantees confidentiality and effectively keeps the office noise outside.

Instant acoustic privacy

Seamless technology

High-performance airflow

CERTIFICATION

Freely Configurable Interior
From an empty pod to a fully furnished space with Hushoffice furniture and accessories.

High-Absorption Interior Surfaces
Modern, aesthetically designed thermoformable acoustic panels.

Colors & Finishes
A curated, nature-inspired system of colours and materials — designed to help you create spaces that feel consistent, intentional and ready for any concept.

Human Centred Lighting
Integrated lighting provides optimal task illumination with adjustable intensity and color temperature to suit different times of the day and personal preferences.

Low-Noise, High-Efficiency Ventilation System
Efficient, quiet ventilation continuously supports fresh air circulation and user comfort.

Human Centred Design
Developed around real user needs, combining comfort, ergonomics, acoustics and intuitive functionality.

Hushassistant
Users can fine-tune internal conditions such as lighting and airflow in seconds, creating a responsive space tailored to individual needs.

Hushbooking
An external display showing pod reservation, which helps to streamline the office organisation (optional).

Door Handle
Durable & high-quality door handle designed to assist people with reduced mobility.

Equal Welcome
Floorless versions available, designed for accessibility and inclusivity.

Future-Proof
Built for today's offices and tomorrow's requirements, sprinkler-ready and future-proof by design.

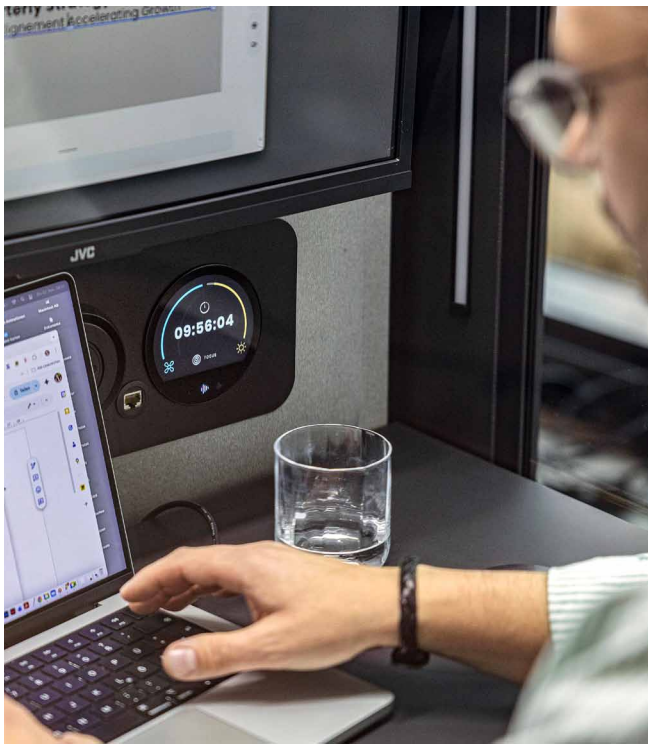

Relocatable Construction
Full pod mobility included as standard for models with flooring.

Hushassistant

Hushassistant is an intuitive control system that puts users in charge of their environment.

1. Ventilation button
2. Ventilation level bar
3. Lighting button
4. Main lighting power level bar
5. Timer button
6. Guest Wi-Fi network button
7. Calendar button
8. Clock
9. Pod name
10. Active mode

Via a simple touchscreen interface, users can easily adjust light color and intensity, control airflow, or reserve a pod with just a few swipes and taps.

All settings can be tailored to the user's individual needs or quickly set using one of five preconfigured modes: Default, Auto, Focus, Relax, and Video Call (available in one-person pods). The reservation system allows for quick, ad-hoc bookings directly from the pod for impromptu meetings, as well as scheduled reservations through devices running on the Microsoft 365 Business platform. Helpful reminders prompt users to take coffee breaks and rest, promoting optimal productivity throughout the day.

A dedicated Demo mode guides users through the Hushassistant's features, making it easy to explore all its capabilities.

With Hushassistant, Hushoffice builds not only acoustic comfort and privacy, but also for what happens inside: human performance, comfort, and wellbeing.

MODE SELECTION

Default mode

Automatic mode

Relax mode

Focus mode

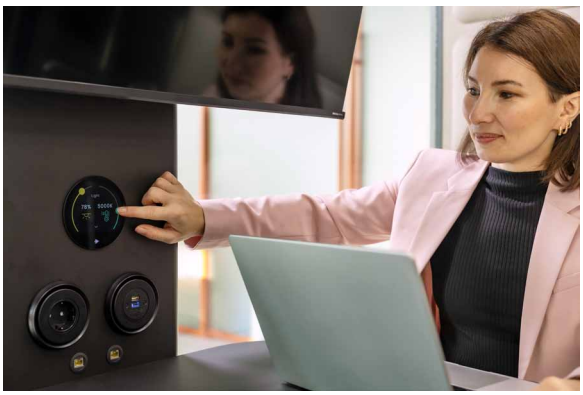

Video Call mode (optional)

EACH MODE COMES WITH PRESET LIGHTING AND VENTILATION SETTINGS:

	Ventilation	Main lighting power	Main lighting color	Side lighting
Default	100%	User settings	User settings	0%
Auto	100%	50%–100%	2700K–6500K	0%
Relax	100%	70%	2800K	0%
Focus	100%	90%	6500K	0%
Video call	100%	60%	4000K	100%

In Default mode, the main lighting power and color are set according to the user's selected preferences.

In Auto mode, the lighting is automatically adjusted based on the human circadian rhythm. This mode aligns the color temperature and light intensity with the time of day (according to a person's circadian rhythm, i.e. an internal body clock), reflecting natural lighting patterns to create a more natural, comfortable environment and stronger connection to the outside world.

Hushfree XS

Hushfree XS is built for the moments that need focus, even when space is limited. Designed to fit seamlessly into compact offices.

This acoustic pod creates a calm and private setting for phone calls, quick video meetings, and focused conversations. Inside, every detail supports how people actually work and connect, from a comfortable desk to balanced lighting that keeps you clearly visible on screen. Intuitive controls make the space easy to use from the first moment. With Hushassistant, smart ventilation, and integrated lighting, Hushfree XS helps you stay present, heard, and comfortable so even short interactions feel more natural and focused.

Hushfree L

The Hushfree L acoustic pod is designed for the moments when teams need space to come together, offering a flexible alternative to medium sized conference rooms.

Created for meetings of up to six people, it supports teamwork, business presentations, and collaborative workshops in a focused and comfortable setting. The interior can be tailored to your office and team needs, either by integrating your own furniture or by choosing from predefined conference or coffee table and sofa configurations. An optional TV or screen mount helps teams collaborate and connect during hybrid meetings. With Hushbooking or Hushassistant, availability stays simple and intuitive for everyone.
