

YOUR HUSH, YOUR WAY

hushoffice

YOUR HUSH, YOUR WAY

Hushoffice pods are a solution for any team struggling to maintain the functionality of their workplace as they grow. In the modern world, where excess stimuli, information overload, and increasing professional expectations prevail, the ability to concentrate is becoming a vital resource. Hushoffice booths provide employees with an ideal work environment, regardless of whether they work individually or in a group. Their primary goal is to support users in carrying out tasks at the highest level of efficiency and comfort. Thanks to the ability to adjust the space to individual needs, Hushoffice pods offer users absolute control over their work environment, which translates into better focus, greater autonomy, and lasting professional development. This flexibility allows you to work at your chosen time, place, and style — in conditions of complete comfort and concentration, by the user's natural rhythm and preferences.

DISCOVER THE HUSHOFFICE ACOUSTIC PODS FROM THE HUSHCLASSIC LINE

Mainstream line of acoustic pods offering 6 different models at an affordable price for the customer. Independent spaces for individual work and meetings guaranteeing privacy and confidentiality of conversations.

Integrated furniture in the form of comfortable sofas and ergonomic tables

Full mobility of small pods

Possibility of moving larger pods without having to dismantle them thanks to the construction adapted for relocation using a pallet truck

Electrical module for the APAC region. Plug type configurable depending on market

Manual regulation of lighting and ventilation using knobs

Upholstered acoustic panels available in 40 colors in 2 types of fabrics to choose from

The modular, expandable design makes hushMeet.L an alternative solution to a traditional conference room

Depending on availability in the region, possibility of adding a GreenWalls to the pod

HushPhone is an acoustic pod designed for short telephone conversations and video chats. It occupies very little office space, and thanks to its system of built-in wheels, it can be easily moved around the office. The booth's interior features an ergonomic armrest that provides comfortable support for the body during conversations. There is also a place for a laptop - a folding table hidden in the cabin wall. A motion sensor in the pod activates the lighting and ventilation system.

TECHNICAL INFORMATION

- **Acoustic pod for 1 person**
- **Dimensions:**
  W: 1000 mm
  D: 900 mm
  H: 2230 mm
- **Acoustic class B**
- **Ventilation parameters**
  2 fans (144 m^3/h / total air exchange in 32 sec., 40 l/s.)
- **Lighting parameters**
  2.5 W/160 lm, 4000 K.

Other technical parameters are available in the product data sheets.
Product visualisation is for reference only. Variations are allowed depending on the version of the product available in a given market.

hushphone

SPECIFICATION

1. LED lighting activated by a motion sensor
2. Ventilation activated by a motion sensor
3. Socket 230V, USB A/C, RJ45 (configurable depending on the region)
4. Aluminium frame with acoustic seal
5. Rear wall made of acoustic glass
6. Laptop folding table
7. Anti-collision marking
8. Upholstered acoustic panels
9. Floor covered with carpet
10. Optionally - a comfortable and ergonomic stool attached to the floor
11. Casters and leveling feet included

For the APAC region, the structure is prepared for sprinkler installation and seismic anchoring

HushHybrid is an acoustic pod designed for more extended periods of work alone and videoconferencing. The possibility of installing an all-in-one computer or a screen for work, along with additional side LED lighting for the user's face, provides even better visibility during video calls. The pod is equipped with an ergonomic work table. The booth features built-in wheels, allowing it to move freely around the office space. Optionally, the pod can be ordered with „privacy" stickers for mounting on glass, giving a „freezing" effect.

TECHNICAL INFORMATION

- **Acoustic pod for 1 person**
- **Dimensions:**
  W: 1244 mm
  D: 900 mm
  H: 2230 mm
- **Acoustic class B**
- **Ventilation parameters**
  2 fans (176 m^3/h / total air exchange in 31 sec., 49 l/s.)
- **Lighting parameters**
  6.4 W/150 lm, 4000 K
  Facial LED stripes 2x 2.4W 4000 K

Other technical parameters are available in the product data sheets.
Product visualisation is for reference only. Variations are allowed depending on the version of the product available in a given market.

hushhybrid

SPECIFICATION

1. LED lighting activated by a motion sensor
2. Ventilation activated by a motion sensor
3. Aluminium frame with acoustic seal
4. Anti-collision marking
5. Rear wall made of acoustic glass
6. Additional face lighting with adjustable intensity
7. TV mount VESA option
8. Socket 230V, USB A/C, RJ45
   (configurable depending on the region)
9. Independent, manual lighting and ventilation controls
10. Worktable

12. Integrated sofa
13. Floor covered with carpet
14. Casters and leveling feet included

For the APAC region, the structure is prepared for sprinkler installation and seismic anchoring

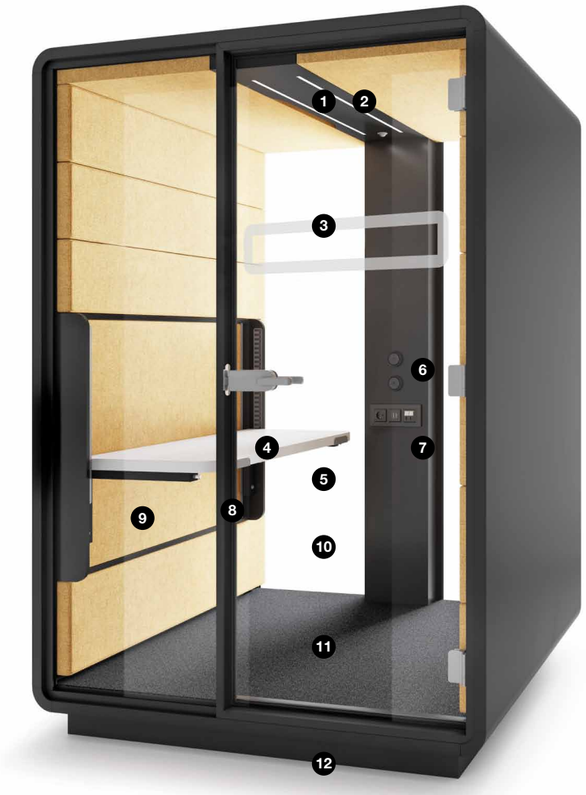

HushWork.Sit&Stand is an acoustic pod that presents a new approach to individual work in the office. It has a desk with manual height adjustment of the tabletop. This function is easy to use, intuitive, and does not require electricity. It is an acoustic pod designed for work while standing and sitting. Thanks to this solution, you can create a small office space for work, allowing for silence and concentration. The booth can be moved without having to be dismantled.

TECHNICAL INFORMATION

- **Acoustic pod for 1 person**
- **Dimensions:**
  W: 1600 mm
  D: 1200 mm
  H: 2300 mm
- **Acoustic class B**
- **Ventilation parameters**
  3 fans (165 m^3/h / total air exchange in 68 sec., 46 l/s)
- **Lighting parameters**
  17 W/1550 lm. 3000 K.

Other technical parameters are available in the product data sheets.
Product visualisation is for reference only. Variations are allowed depending on the version of the product available in a given market.

hushwork.Sit&Stand

SPECIFICATION

1. LED lighting activated by a motion sensor
2. Ventilation activated by a motion sensor
3. Anti-collision marking
4. Desk with manual height adjustment of the top, in the range of 665-1220 mm
5. Rear wall made of acoustic glass
6. Independent, manual lighting and ventilation controls
7. Socket 230V, USB A/C, RJ45 (configurable depending on the region)
8. Aluminium frame with acoustic seal
9. Upholstered acoustic panels
10. Rear wall made of acoustic glass
11. Floor covered with carpet
12. Construction enabling the product to be moved without the need to disassemble

For the APAC region, the structure is prepared for sprinkler installation and seismic anchoring

HushMeet.S is an acoustic booth for work and two-person meetings. Thanks to its compact size, it fits nicely into the interior of any office space, especially where space is at a premium. It allows for free, spontaneous meetings and works peacefully for two people. The booth can be moved without having to be dismantled.

TECHNICAL INFORMATION

- **Acoustic pod for 2 people**
- **Dimensions:**
  W: 2150 mm
  D: 900 mm
  H: 2300 mm
- **Acoustic class B**
- **Ventilation parameters**
  4 fans (180 m^3/h / total air exchange in 63 sec., 50 l/s)
- **Lighting parameters**
  15 W/1160 lm, 3000 K.

Other technical parameters are available in the product data sheets.
Product visualisation is for reference only. Variations are allowed depending on the version of the product available in a given market.

hushmeet.S

SPECIFICATION

1. LED lighting activated by a motion sensor
2. Ventilation activated by a motion sensor
3. Independent, manual lighting and ventilation controls
4. Anti-collision marking
5. Aluminium frame with acoustic seal
6. Upholstered acoustic panels
7. Socket 230V, USB A/C, RJ45 (configurable depending on the region)
8. Integrated meeting table
9. Two comfortable one-seater sofas
10. Rear wall made of acoustic glass
11. Floor covered with carpet
12. Construction enabling the product to be moved without the need to disassemble

For the APAC region, the structure is prepared for sprinkler installation and seismic anchoring

HushMeet is an acoustic booth that provides an independent space for work and meetings in the office. It can be used to conduct sessions for four people in comfortable conditions. The booth offers a comfortable acoustic environment, ensuring confidentiality and privacy of conversations. HushMeet is an ideal space for the creative work of a small team and meetings requiring privacy. The booth can be moved without disassembly. The version for four users takes up the same space as a standard workstation with two desks.

TECHNICAL INFORMATION

- **Acoustic pod for 4 people**
- **Dimensions:**
  W: 2150 mm
  D: 1390 mm
  H: 2300 mm
- **Acoustic class B**
- **Ventilation parameters**
  6 fans (270 m^3/h / total air exchange in 68 sec., 75 l/s)
- **Lighting parameters**
  19.2 W/1940 lm, 3000 K

Other technical parameters are available in the product data sheets.
Product visualisation is for reference only. Variations are allowed depending on the version of the product available in a given market.

hushmeet

SPECIFICATION

1. LED lighting activated by a motion sensor
2. Ventilation activated by a motion sensor
3. Anti-collision marking
4. Rear wall made of acoustic glass
5. Aluminium frame with acoustic seal
6. Upholstered acoustic panels
7. Possibility of hanging the TV
8. Independent, manual lighting and ventilation controls
9. Socket 230V, USB A/C, RJ45 (configurable depending on the region)
10. Integrated meeting table
11. Two comfortable two-seater sofas
12. Floor covered with carpet
13. Construction enabling the product to be moved without the need to disassemble

For the APAC region, the structure is prepared for sprinkler installation and seismic anchoring

HushMeet.L is an acoustic pod that serves as an excellent alternative to traditional, smaller conference rooms. Thanks to its modular design, it perfectly adapts to the office's needs, and you can add additional modules to it to increase its size. It is an ideal space for larger team meetings, video conferences, and project meetings. Without rebuilding or renovating the existing office space, the user gains a peaceful and quiet environment in which to work and meet. For each size of pod, which can be built thanks to modularity, we have adapted three conference tables in an ergonomic trapezoidal shape.

TECHNICAL INFORMATION

- **Acoustic pod up to 4-8 people**
- **Dimensions:**
  W: 2600 mm
  D: 2700 mm
  H: 2300 mm
- **Acoustic class C**
- **Ventilation parameters**
  (3-module pod): 12 fans (576 m^3/h / total air exchange in 78 sec., 160 l/s)
- **Lighting parameters**
  (3-module pod): 41.4 W/4200 lm, 3000 K.

Other technical parameters are available in the product data sheets.
Product visualisation is for reference only. Variations are allowed depending on the version of the product available in a given market.

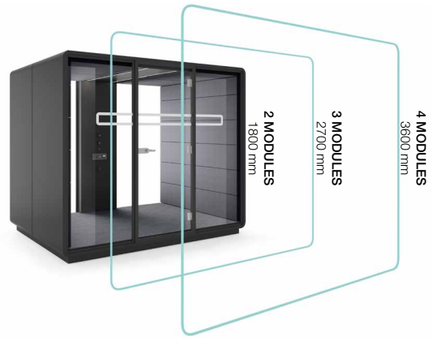

hushmeet.L

SPECIFICATION

1. LED lighting activated by a motion sensor
2. Ventilation activated by a motion sensor
3. Rear wall made of acoustic glass
4. Aluminium frame with acoustic seal
5. Upholstered acoustic panels
6. Possibility of hanging the TV
7. Independent, manual lighting and ventilation controls

   (configurable depending on the region)
9. Integrated meeting table (option)
10. Floor covered with carpet
11. Design that allows the product to be moved after partial disassembly

For the APAC region, the structure is prepared for sprinkler installation and seismic anchoring

Greenwalls*

The greenWalls green wall is an accessory for Hushoffice acoustic pods, which, in a simple, aesthetic, and intuitive way, allows for everyday contact with nature in the office. The greenWall system consists of a body, integrated flowerpots, and an electronically controlled irrigation system. A green wall constructed in this way develops the external part of Hushoffice acoustic cabins, allowing you to create a living, natural wall with plants on it. Relaxing greenery and cleaner air improve working conditions in the office.

*Availability depends on the offer per region.
