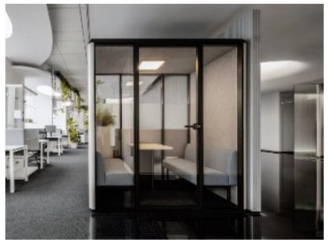
FOR OUR DEALER PARTNERS

Every larger meeting pod we offer, in one guide.

Large meeting pods seat six to eight people and work as a freestanding conference room – a fast, flexible alternative to building a new meeting room, especially in leased offices.

Pods are ordered by price level, from budget to premium. Each pod has its key features and specification, followed by a side-by-side comparison, colours and finishes, and what we need to quote.

5	4	30.3	5 yr
pods	leading ranges	dB, best speech reduction	warranty



Price levels

Budget — £–££

MusePod MD5. Exceptional value and quick lead times, without compromising on acoustics.

Mid-range — £££

HushMeet L. Proven, practical pods from a brand end users recognise.

Premium — ££££

HushFree L, Bubliing XL, Bubliing R. Design-led pods with top acoustics and the widest choice of finishes.

Acoustics explained

Every pod is quoted with its speech level reduction in decibels, measured to ISO 23351-1. Around 30 dB puts a normal speaking voice below the level of the surrounding office at one metre from the pod. These larger meeting pods sit between 28.9 and 30.3 dB.

Price bands (£ to ££££) reflect the range rather than the individual pod. Contact us for dealer pricing on any project.

BUYING GUIDE

How to choose a large meeting pod.

01
Count the seats
The MusePod MD5 and HushFree L seat up to six, the Bubliing XL and Bubliing R six to eight, and the HushMeet L four to eight around a table, with extended lengths available.

02
Check the floor space and ceiling
Our large pods range from 2200 × 1970mm to the 3 × 3m Bubliing R, and are 2245–2320mm tall. Allow room for the door to open and a clear walkway around the pod.

03
Plan the delivery route
Because of their size, we survey the access route, lifts and ceiling height before every installation to make sure everything fits.

04
Set it up for presentations and video
The HushFree L is ideal for presentations and group video calls. Ask about screen mounts and extra power so the pod works for hybrid meetings.

05
Match the budget and lead time
The MusePod MD5 is the best-value 6-person pod, the HushMeet L sits in the middle, and the HushFree L and Bubliing pods are premium. Lead times run from around six to twelve weeks.

06
Compare every size
See our meeting pods guide at silentcollective.co.uk/meeting-pods to compare all 13 of our meeting pods, or design your large meeting pod in 3D and send us the spec for a quote.

What we need to quote
Send these and we will come back with a full quote within one working day.

1. Pod model(s) and quantity
2. Delivery and installation address
3. Finishes, or a configurator link
4. Floor level and lift or access route
5. Ceiling height and power position
6. Target installation date

WORKING WITH SILENT COLLECTIVE

Support for you and your clients.

You lead the project and liaise with your client. We are behind you at every stage, from first recommendation to aftercare.

01
Fast, expert answers
Questions on acoustics, finishes, lead times or a whole floor of pods, answered within one working day.

02
Samples & showroom
Physical finish samples, and demos at our Clerkenwell showroom where your clients can sit in the pods and hear the difference.

03
3D configurator
Design pods for your clients online, share links and PDF specifications, and send the final design to us for pricing.

04
Site surveys
We survey the space before we quote, so the recommendation fits the floorplate, access route and power position.

05
Delivery & installation
Our own fitting team delivers and installs nationwide across the UK, with photo and video proof of install.

06
Aftercare
Every pod carries a five-year warranty, backed by engineers who can be on site quickly.
