FOR OUR DEALER PARTNERS

Every work, focus and video pod we offer, in one guide.

Work pods – also called focus pods or individual office pods – are single-person acoustic rooms for heads-down work and long video calls. Unlike a phone booth, they are made for sitting in comfortably for an hour or more.

Pods are ordered by price level, from budget to premium. Each pod has its key features and specification, followed by a side-by-side comparison, colours and finishes, and what we need to quote.

6	3	30.3	5 yr
pods	leading ranges	dB, best speech reduction	warranty

Price levels

Budget — £–££

MusePod MD 1.5, MusePod MD2 Work. Exceptional value and quick lead times, without compromising on acoustics.

Mid-range — £££

HushHybrid, HushWork. Proven, practical pods from a brand end users recognise.

Premium — ££££

HushFree Hybrid, HushFree Work. Design-led pods with top acoustics and the widest choice of finishes.

Acoustics explained

Every pod is quoted with its speech level reduction in decibels, measured to ISO 23351-1. Around 30 dB puts a normal speaking voice below the level of the surrounding office at one metre from the pod. These work, focus and video pods sit between 28.9 and 30.3 dB.

Price bands (£ to ££££) reflect the range rather than the individual pod. Contact us for dealer pricing on any project.

BUYING GUIDE

How to choose a work or video pod.

01

Focus work or video calls?

For concentrated work, choose a work pod with a full desk, such as the HushWork, HushFree Work or MusePod MD2 Work. For back-to-back Teams and Zoom calls, a video pod like the HushHybrid or HushFree Hybrid adds a comfortable seat and the option of a screen.

02

Plan the desk set-up

The HushWork has an electrically height-adjustable desk so you can sit or stand. Larger pods such as the HushFree Work (1800 × 1200mm) leave room for a laptop, notes and a second screen.

03

Make it comfortable for long sessions

Every pod has built-in ventilation, lighting and power, and switches on automatically when someone walks in. For all-day use, a roomier footprint makes a real difference.

04

Get video calls right

The Hybrid pods can take a screen on a VESA mount, so you can join calls on a proper monitor with good lighting. Tell us how your team works and we will recommend the right set-up.

05

Match the budget and lead time

MusePod is our best-value range – the MD 1.5 gives more space than a phone booth without stretching the budget. HushClassic sits in the middle and HushFree is premium. Lead times run from around six to twelve weeks.

06

See it, then design it

Visit our Clerkenwell showroom to sit in the pods, or design your work pod in 3D – choose colours, fabrics and options, then send us the spec for a quote.

What we need to quote

Send these and we will come back with a full quote within one working day.

1. Pod model(s) and quantity
2. Delivery and installation address
3. Finishes, or a configurator link
4. Floor level and lift or access route
5. Ceiling height and power position
6. Target installation date

Exterior colours shown. Every finish is in our range finishes guides and the 3D configurator. Colours are a guide only; physical samples available on request. Upcharges apply to some colours and premium fabrics.

WORKING WITH SILENT COLLECTIVE

Support for you and your clients.

You lead the project and liaise with your client. We are behind you at every stage, from first recommendation to aftercare.

01
Fast, expert answers
Questions on acoustics, finishes, lead times or a whole floor of pods, answered within one working day.

02
Samples & showroom
Physical finish samples, and demos at our Clerkenwell showroom where your clients can sit in the pods and hear the difference.

03
3D configurator
Design pods for your clients online, share links and PDF specifications, and send the final design to us for pricing.

04
Site surveys
We survey the space before we quote, so the recommendation fits the floorplate, access route and power position.

05
Delivery & installation
Our own fitting team delivers and installs nationwide across the UK, with photo and video proof of install.

06
Aftercare
Every pod carries a five-year warranty, backed by engineers who can be on site quickly.
